To the people of Yarmouth,

We have something unique that is going to waste, Yarmouth is full of possibilities, potential and room to grow. All we need to do is get off our butts and do something about it right now! The future of Yarmouth is unstable; here are some possibilities to save our town, families and our homes.

The problem with Yarmouth is nobody knows what's here and where we are in the world. We need to advertise the good things that Yarmouth has to offer, and attract a larger market from in and out of North America. Yarmouth has a number of key attributes that can be exploited to attract and expand tourism and promote the growth of Yarmouth. The key to this is using the international airport. Attracting airlines from other countries would solve our tourist problem, help the economy grow and maybe expand where and how we sell our lobster. Putting Yarmouth on the map is crucial to its survival. Here are some of the unique qualities we possess.

- Fantastic oceans, beaches and fishing.
- Unique town, seafood and hospitality.
- Native Mi'kmaq culture.
- Hotels, golf, hiking, hunting and community events.
- Clean, no pollution and friendly people.

We believe that Yarmouth needs to be presented to the world so that many different countries and cultures can enjoy what Yarmouth has to offer.

If this could be done, Yarmouth would become a worldwide destination, and so ensuring our future and displaying to the world a little bit more of Canada.

So what do you think of our proposal? Please write back with your opinion, so we can get some action.

Yours faithfully  
Class of 2010.

CC. Mayor of Yarmouth,

**What Yarmouth has to offer the world needs to know?**

As tax payers, parents and providers to our children. We need to know what our and their futures will be, because right now it looks bleak. The facts are we have lost the train; buses, air-link and now our ferry. Our economy is declining and our talented youth are leaving. We will be a Ghost town if the politicians don't Smarten-up! The normal people want politicians to stop wasting tax-payers money, be accountable for their spending and to the people they represent. We need to make a whole lot of changes to provide us with a future.

Yarmouth as a sea-port community with lots of fishing, hunting, multi-cultural people, events and spectacular scenery that needs to be put on the world map .We need the people to come to Yarmouth and spend their money so our economy grows. Its time to get (acquainted) with the world.

To get people here we need to re-open our international airport, establish links to Europe, America and the rest of Canada.

Advertising and establishing an international transport link is our key to the town's survival. We hope you read this as we would like to receive your comments, thank you.

Concerned citizens of Yarmouth.
