**Subject: Lights out Canada**

Hello everyone.

If anyone is interested in participating in this on April 22<sup>nd</sup> (earth day), it is a great way to educate our students about energy conservation. I have signed our school up to participate.

**By participating in Lights Out, you will be joining other engaged youth and educators across Canada who want to reduce their ecological footprint. It is our generation that will be most affected by global warming and it is up to us to start changing our habits now so that we will have an inhabitable earth in the future.**

**The idea behind Lights Out is that small changes add up to make a big difference. It is within all of our power to commit to making those small changes together.**

**Participating in Lights Out World is not a daunting task. The Lights Out Team has compiled step-by-step instructions and comprehensive lesson plans - the tools you need to make Lights Out a success at your school.**

The website for information is at:
